AT A GLANCE

FEATURES

- TFXtreme's unique design incorporates a patent-pending splined core which allows easy movement and minimum lost motion
- Designed for complex and/or long cable runs (or to simply create a superior feel)
- Available in several style options avoiding the need for adaptor kits
- All TFXtreme cables are available in 1ft increments
- Gen II type suits Mercury 4000 series controls

Cross section view

TFXTREME ENGINE CONTROL CABLES

TECHNICAL DATA

With it's unique splined core TFXtreme delivers unparalleled smoothness and efficiency - with hardly any lost motion - even in the longest and most complex cable routings. This gives superior feel at the control, performance that until now was considered 'impossible'.

NOTE - XX =cable length in feet

33C - 3300 TYPE CONTROL CABLES

3300/33C type cables (10-32 end threads). Engines and connection kits that accept a 10-32 threaded end may require a connection kit from Teleflex or the engine manufacturer.

Standard grade - Black cable conduit color with brass ends. Stainless steel core with wire/brass fittings. For I/O's, inboards and outboards. 10/32 SAE threads. Nominal 3" travel with 6" minimum bend radius.

Midrange grade - Red conduit color with stainless ends. Stainless steel core with wire/brass fittings. For I/O's, inboards and outboards. 10/32 SAE threads. Nominal 3" travel with 6" minimum bend radius

Premium grade - Black conduit color with stainless ends. TFXtreme's unique design incorporates a patent-pending splined core which allows easy movement and minimum lost motion. Designed for complex and/or long cable runs (or to simply create a superior feel).

All TFXtreme cables are available in 1ft increments. Gen II type suits Mercury 4000 series controls. 3300/33C (with 10-32 Treaded End 3" Travel).

43C TYPE CONTROL CABLES

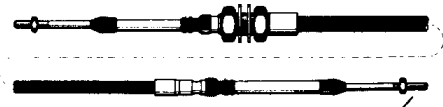

43C
1/4-28 THREAD

Part# 65885-003. Heavy duty shift and throttle cable with 3" travel and 1/4 - 28 SAE threads. 8" minimum bend radius. Recommended where heavy use or higher operating loads are encountered. For use on inboards and jets. Stainless steel armored core and end fittings. Note: In many instances, 33C Supreme cables can be used in place of 43C cables to improve control performance but you need to use 30 series cable connection hardware in place of 40 series.

KE-4 ELECTRONIC ENGINE CONTROL SYSTEM

New installation or retrofit - this control mates with any engine, inboard, outboard or stern drive; gas or diesel; our electronic control will replace cumbersome linkage, push-pull cables, hydraulic or pneumatic systems on pleasure boats and commercial craft alike. Features: Easy installation, fail safe operation, self-diagnosis system, control head with built-in station select switch, up to 3 stations, optional mechanical backup, gas or diesel engines, overload protection, single-lever dual function control, neutral warm-up provision.

MT-3 CONTROL

A dual function, single lever control recommended for single station applications on single and twin engine, inboards with hydraulic transmissions, outboards and I/O's. Pull out hand levers in neutral position to disengage clutch for start and warm up. Neutral safety switch to help prevent starting in gear. Crisp, positive detent lets you feel the gear selection. Built in friction drag helps prevent slippage and throttle creep. Handle and housing are heavily chrome plated for extra corrosion resistance. Adjustable shift travel. Uses 33C or 33C supreme cables. 2.77 : 1 Shift, 3.57 : 1 Throttle, mechanical advantage.

SL-3 CONTROL

A dual function, single lever control with a perfect match to any engine, outboard, inboard or sterndrive. Use on Evinrude, Johnson, Honda, Mariner, Mercury, Nissan, OMC, Cobra, Suzuki, Tohatsu, US Marine/Force, Volvo, Yamaha. Port or starboard installation with various cable entry angles. Firm yet effortless shift and throttle motion. Entire mechanism enclosed and permanently lubricated. Easy on cable design. no adjustments - no modifications. Push button for neutral engine warm up. Trim switch in handle grip for one hand operation. Neutral interlock prevents starting in gear. Adjustable brake prevents throttle creep. Mechanical advantage 2.38 : 1. Accepts Mercury(KM), OMC(O,OS), (33C/Supreme) cables.

"S" & "TWIN S" CONTROL

A single function with one or two lever control for use on motor yachts with I/O's or inboards with hydraulic transmissions. Provides operation of throttle or clutch on single (S) or twin (TWIN S) engines. Easily adapts to multiple stations.

- Adjustable brakes and stops. Heavy chrome plated. Heavy duty kit for use with 43C cables. Optional neutral safety switch to prevent starting in gear. Optional gear detent for dual stations. 2.77 : 1 Shift and 2.77 : 1 Throttle mechanical advantage. Optional throttle hold kit prevents throttle creep. Uses 33C, 33C Supreme and 43C cables.

"S" CONTROL CLUTCH DETENT KIT

MOR22328	CLUTCH DETENT KIT.....	\$ 25.49
----------	------------------------	----------

DUAL STATION TRANSFER UNIT

Ideal for parallel dual station installations when two-lever single function controls are used. The transfer unit allows two clutch or two throttle cables to be connected to a single cable leading aft to the engine. These units are recommended for installations with long or difficult cable paths to eliminate undesirable cable bends that cause cable backlash and reduced efficiency.

MOR61371	TRANSFER UNIT.....	\$ 248.99
----------	--------------------	-----------

TWIN SR CONTROLS

The SR control is a two lever control used on major yachts with I/O's or inboards with hydraulic transmissions. The SR provides operation of throttle on a (TWIN SR) engine. Easily adapts to multiple stations. Easy to install and low maintenance. Adjustable brakes and stops. Heavy duty kit for use with 43C cables. Optional neutral safety switch to prevent starting in gear. 3.10 : 1 Shift and 3.10 : 1 Throttle mechanical advantage.
 - Uses 33C, 33C Supreme or 43C heavy duty cables.
