WELD MOUNT SYSTEMS HOSE & CABLE CLAMPS

Our Weld Mount clamps are available as single or double units. Each is designed to be mounted using our 1/4" x 20 Weld Mount studs. The chart below details the stud required for each size of clamp. The clamps are manufactured of black polypropylene and are temperature rated for -22 to +194 degrees F continuous service. These clamps are available at a per piece price with no minimum quantities or at reduced price based on purchase of bag quantities. Other sizes are available. Maximum hose OD is 1".

WELD MOUNT SYSTEMS NYLON WIRE TIE MOUNT

The tie mount is smaller for panel and other small space applications. This part is molded in white nylon and is sized for a #3 wire tie with a maximum width of .20". Average pull strength is about 50 lbs. The square base measures .44" wide. Use this smaller wire tie for runs with only a few wires or where space prevents use of our larger tie mounts. Excellent for mounting compass wires on center console boats and for overhead panel runs.

WELD MOUNT SYSTEMS WHITE NYLON WIRE TIE MOUNT

The tie mount is designed to be set into wet resin during the hull lay up or bonded with our acrylic adhesives. It's designed for a #5 wire tie and has an average pull strength of 150 lbs. It's approved for submerged bilge applications. Stop putting plywood in your hull just to have a place to drive wire tie screws. Saves material and labor costs!

WELD MOUNT SYSTEMS FOOTMAN'S STRAP MOUNT

The strap mount is designed to be bonded with or AT-2010 or AT-4020 acrylic adhesive. This strap mount is 3.25" long X 1" wide and holds up to a 1.3" max strap width. The AT-113 is incredibly strong and is rated for over 800 lbs in tensile and it's paintable. The AT-113 strap mount is bonded to the outside of the Abrams A1 tank. Use it for battery and tank tie downs and mounting heavy hoses and cables or deck mounted for life raft tie downs.

WELD MOUNT SYSTEMS PANEL MOUNT

These small panel studs have a wide range of uses. Originally they were used for mounting on the backside of dash panels or for mounting to the console. Now they are used for securing a wide range of wire clamps and other small components to composite surfaces. The base plate is 0.62" in diameter with a .75" or 1.5" tall stud. Tensile strength is 300 lbs and shear strength is 375 lbs.
