TAYLOR PONTOON FENDERS

The **Fence Saver** secures to the fence or railing and is designed to prevent contact to the delicate aluminum fencing. The pontoon corner bumpers come in two shapes for both radius style or 90° pontoon corners. The **corner bumpers** mount over the original factory installed aluminum corner section to provide air-cushioning impact protection when docking. Each corner section is molded from a special gray pvc formulated to match the aluminum color of the boat and secures with stainless fasteners. All pontoon fenders are made from our own marine-grade, U.V. resistant vinyl and have an integrated rubber football style valve for easy inflation.

KWIK-TEK HULL HUGR XL CONTOUR FENDERS

Traditional round fenders protect hulls fairly well, but not gunwales. They tend to roll and lift, leaving your boat open to damage. Boats with step-down gunwales are especially vulnerable. HULL HUGR Contour Fenders hinge at the rub rail to wrap around the gunwale and hull, following the contours of the boat. They always stay put, unlike other fenders. They're constructed of durable tri-laminate covering closed cell foam with 1/2 inch ID polycarbonate grommets. HULL HUGRs stow in half the space of a round fender, under seats or inside storage compartments. Size: 30" long x 6" wide x 4" thick.
