

THETFORD PORTA-POTTI

This self-contained portable head is a simple, inexpensive alternative to a permanent marine head installation. Fresh water is held in the upper tank, while waste is stored in the lower tank. Simply detach the lower tank when full and dispose at any shoreside facility. A built in pour spout reduces splatters. Includes storage for waste tank chemical bottle.

THETFORD AQUA-KEM HOLDING TANK DEODORANTS

An RV's toilet is located over, and empties directly into, the Black Water Holding Tank. The three most common Black Water Holding Tank problems are deodorizing, cleaning and breakdown of solid waste. Thetford deodorants outsell their competitors combined because they do a superior job in these three problem areas.

JABSCO MACERATOR PUMPS

RUN-DRY MACERATOR PUMP. The Jabsco Macerator pump unit is the ideal answer to holding tank pump out problems for boats and recreational vehicles. Run-dry protection electronics makes impeller damage a thing of the past. Detects the absence of fluid then shuts-off pump before impeller is damaged. Sensor provides a 16 - 20 second run-dry period to allow initial priming of pump. Interrupting power supply to the macerator resets the Run-Dry Device. Flow rate to 12 gpm (45 lpm). Self-priming to 4ft (1.2m) vertical lift. Complies with USCG 183.410 and ISO 8846 MARINE (Ignition Protection).
 Marine Model: Inlet port 1 1/2" (38mm) hose barb plus 1 1/2" NPT 0257-0189 18590-1000 RV Model: Inlet port 3" (75mm) hose. Discharge port: 1" (25mm) hose.

JOHNSON PUMPS VIKING 32 POWER

Single-chamber design and non-choke valves, the Viking Power 32, can be used to pump un-macerated sewage to a holding tank or transfer it onwards to a septic tank. The Viking Power Vacuum has double check-valves and can therefore also be used in vacuum toilet systems. Naturally, pumping ordinary shower or sink drain water or bilge water is no problem for either pump. Like the Viking Power 16, this new pump has been engineered with a ball-bearing supported transmission for long service life. The pump can not only be run dry, it can also handle a mixture of air and water without difficulty. Vacuum provides maximum flow of 32 liters per minute and is self-priming up to a height of 2.5 (32) or 3.5 (Vacuum) meters. Although powered by an electric motor, this pump can also be cranked by hand in an emergency. The pump has been designed to prevent the leakage of unpleasant odors. Vacuum can be installed in a variety of different positions.

JABSCO 45490-1000 Y-VALVE

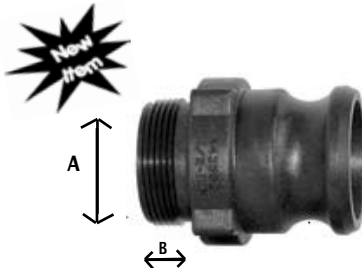

The Jabsco Y-Valve diverts waste from a toilet to either an onboard holding tank or directly overboard where legal to do so. It can be used to direct waste from a holding tank to either an onboard discharge pump or a deck waste fitting for dockside pumpout. Its self cleaning design provides trouble free operation. Has a large easy to turn handle with integral locking ring that allows it to be locked or sealed in either position. The 1-1/2" curved discharge ports can be rotated through 360 degrees so the discharge hoses can be routed away in parallel, at 90 degrees to each other. It is supplied with both a 1-1/2" (fitted) and 1" straight inlet port for easy attachment to toilets with 1" discharge hoses.

JAB45490-1000 JABSCO Y-VALVE\$ 76.95

SEALAND NOZ-ALL PUMPOUT ADAPTER

The Sealand Noz-All pumpout adapter provides an airtight seal between your boat's deck waste fitting and the pump-out station nozzle. An airtight seal ensures thorough emptying of waste holding tanks. The Noz All is available in different thread sizes and diameters to fit multiple thru-hull dimensions, and adapter end is tapered to seal tightly with pump-out nozzle assemblies.
