FIREBOY GAS FUME DETECTOR 2"

Gasoline fumes in a bilge or engine compartment, with or without a blower fan, have the potential to be a serious risk at any time. An ideal single channel gasoline fume detector, the M-1 features high-tech styling, compact size, circuitry Test and alarm horn Mute functions. The power on indicator lamp automatically increases in brightness during daylight and softens at night. *The MB-1 adds a 10 amp relay to automatically start the bilge blower fan should gasoline fumes be detected.

FIR-MB1R	GAS FUME DETECTOR 2" W/10AMP RELAY	\$ 215.95	F

FIREBOY PROPANE SENSOR

This is a simple, single channel propane fume detector that features a plug-in sensor and a Var-A-Brite indicator lamp that brightens during the day and softens at night. Complete unit includes display module, one propane sensor and 20 feet of connector wire. On / off switch opens and closes solenoid with the touch of a button.

FIR-S1A	PROPANE SENSOR W/SOLENOID/VALVE	\$ 243.95	F
FIR-S1A-NV	PROPANE SENSOR W/SOLENOID/NO VALVE	\$ 188.95	F

FIREBOY PROPANE SOLENOID VALVE CONTROL

The C1 is a simple solenoid valve control that features an "ON/OFF" and LED that illuminates when the solenoid valve is open. Includes one SV-1 1/4" solenoid valve. The system is calibrated at 20% LEL (lower explosive limit) to eliminate most nuisance alarms while allowing enough time to take action. The solenoid valve is normally closed and must have power applied to open it. Mount the solenoid valve on the tank side of the regulator for LPG installations.

Accessories: SV-1 Solenoid Valve.

SV-1 1/4" valve. Operates on 12VDC. Opens/closes flow of propane with Xintex models C1, S14, and S2A. Valve is normally closed. Automatically closes with no or low electric current. 0-312 psi. UL listed. ABYC standards.

FIR-SV1	12VDC 1/4" SOLENOID VALVE	\$ 64.95	F

ACR ELECTRONICS RAPID FIRE STROBE LIGHT

Pull-pin lanyard clips to bottom of inflation chamber. Light test feature with "Test Key" to ensure readiness. Easy to mount-fits on inflation tube via "O" Ring which will not damage inflation tube, or fits on any strap of conventional life jacket. "Tamper Tab" breaks to indicate light has been activated. Long term storage lithium battery-10 year storage life (recommended replacement 5 years from date of purchase-write month/year of replacement date on case at time of purchase). Operating life-approximately 8 hours continuous at -20C (-4F).

ACR3961.1 RAPID FIRE STROBE LIGHT.....\$ 38.95 F

ACR DISTRESS O.S. LIGHT

Safe alternative replacement to pyrotechnics; the ACR 1842 puts an end to the handling, replacement and disposal of dangerous flares. Distress S.O.S lasts forever, just replace batteries annually. Features: Complies with USCG requirements for night visual signal. Flashes S.O.S Morse Code when on. Visible for over 22 miles with over 50,000 candles. Installs easily in new rafts or as a retro-fit. Uses 4 "D" alkaline batteries; federal law requires batteries to be replaced annually. Pair with USCG flag to meet USCG day and night visual distress requirements. Water proof to 10 ft (3M). Pistol style design, grip and sight for easy operation. Compact body-measuring only 2 1/8 x 5 1/32 x 1 15/32 in, the IC-F21GM is truly portable. It's small enough to fit into a pocket. And, since it weighs only 10.6 oz. , you can carry one all day without fatigue or fuss.

ACR1842 DISTRESS O.S. LIGHT.....\$ 22.95 * F

ACR GLOBAL FIX CATEGORY II

Internal GPS engine allows faster 406 EPIRB location than standard, non-GPS-enabled models; can update position every 20 minutes. New GPS engine provides faster acquisition time. EPIRB has Circuitry, Battery Voltage and GPS Acquisition Test features built in, or can be fully tested at a BRC (See Glossary-Full Functional Self-Test). Patented proprietary electronics package for faster, more stable 406 frequency transmission. Field Programmable at BRC equipped with FPR-100, FPR-10. 48 hours operating life at -40C (-40F), allowing for monthly self-test for 5 years. Lanyard coil retained with all around cover for non-tangling deployment. Universal usage illustrations; English and French languages. Mounting Bracket included with EPIRB purchase. Transmits on 406 MHz (COSPAS-SARSAT) with your registered, unique, digitally-coded distress signal, and 121.5 MHz (SAR homing frequency) Built-in strobe for enhanced location in poor visibility conditions. Single, three-position switch for easy test of battery, EPIRB and GPS operation. Steady green LED indicates unit has passed full functional EPIRB test. Flashing red LED indicates unit is "ON". Can be manually activated; self-buoyant - no external float collar to lose. High impact plastic case designed to withstand exposure to UV rays, oil, sea water and raft packing.
